
FOR IMMEDIATE RELEASE: 9/28/2021 *Announcement* - From: **TrackMy Solutions Inc., Lenexa, KS**

TrackMy Solutions Officially Accepted into AWS GovTechStart, the Amazon Web Services (AWS) Government Technology Accelerator

We are very excited to announce that TrackMy Solutions has officially been accepted into **AWS GovTechStart**, the Amazon Web Services (AWS) government technology (GovTech) accelerator, focused on helping eligible U.S. businesses build the next generation of technology solutions for state and local government agencies using the power of the AWS Cloud.

"We choose AWS as our cloud-provider over 4 years ago, with initially rolling out our TrackMy Implants solution - focused on tracking implantable devices for recalls and safety warnings. AWS Cloud and all the encompassing services has allowed us utmost scalability and flexibility as we have centralized our technology stack with our roll-out this year of TrackMy Vaccines, and our most recent release - TrackMy VeriVax. AWS continues to be a market leader in Cloud hosting, IT Security and scalability and we are ecstatic to have met and exceeded the criteria to further our partnership with AWS through now joining their GovTechStart ecosystem. The AWS State and Local Government team are unmatched market experts - and we are thrilled to be working alongside them to deliver the next wave of GovTech to the industry. We would encourage any businesses that are starting in the GovTech space to reach out to the AWS team to learn more about their program and how AWS can help." - Jeremy Elias, Founder and CEO - TrackMy Solutions
